### 4. FIRST-AID MEASURES

|     |                                   |                                                                                                                                                                                                                                                                                            |
|-----|-----------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 4.1 | Description of Necessary Measures |                                                                                                                                                                                                                                                                                            |
|     | Skin exposure:                    | If this product contaminates the skin, immediately begin decontamination with running water. Remove exposed or contaminated clothing, taking care not to contaminate eyes. Victim should seek immediate medical attention if any adverse exposure symptoms develop or irritation persists. |

|                                                                                                                                                                                                                                           |                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                              |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                                                                                                                                                                                           | Eye exposure:                                                                         | If this product enters the eyes, open victim's eyes while under gently running water. Use sufficient force to open eyelids. Victim should "roll" eyes while being flushed. Minimum flushing is for 15 minutes. Seek medical attention immediately.                                                                                                                                                           |
|                                                                                                                                                                                                                                           | Inhalation:                                                                           | If this product is inhaled, remove victim to fresh air and place in a position comfortable for breathing. If necessary, use artificial respiration to support vital functions. Remove or cover gross contamination to avoid exposure to rescuers.                                                                                                                                                            |
|                                                                                                                                                                                                                                           | Ingestion:                                                                            | If this product is swallowed, CALL POISON CENTER or PHYSICIAN FOR MOST CURRENT INFORMATION. DO NOT INDUCE VOMITING. Mouth should be rinsed with water if conscious. Never induce vomiting or give a diluent (e.g., water) to someone who is unconscious, having convulsions, or unable to swallow. If contaminated individual is convulsing, maintain an open airway and obtain immediate medical attention. |
| 4.2                                                                                                                                                                                                                                       | Most Important Symptoms/Effects:                                                      | Immediate: Inhalation exposure may cause coughing or sneezing/respiratory tract irritation or difficulty breathing. Symptoms of skin and eye contact may include redness and irritation. Ingestion may cause stomach pains, cramps, and gastritis.<br><br>Delayed: Prolonged or repeated skin overexposure to this product may cause dermatitis (dry, red skin).                                             |
| 4.3                                                                                                                                                                                                                                       | Indication Of Immediate Medical Attention And Special Treatment Needed, If Necessary: | None known.<br><br><b>TARGET ORGANS:</b> Acute: Eyes, Skin                                                                                                                                                                                                                                                                                                                                                   |
| Victims of chemical exposure must be taken for medical attention if any adverse effects occur. Rescuers should be taken for medical attention if necessary. Take a copy of label and SDS to physician or health professional with victim. |                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                              |

## 5. FIRE-FIGHTING MEASURES

|             |                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |             |     |                |     |      |     |              |     |       |     |       |  |

| 5.2         | Specific Hazards Arising from Chemical:                         | When involved in a fire, this material may decompose and produce irritating fumes and toxic gases.<br><br><u>Explosion Sensitivity to Mechanical Impact:</u> None.<br><u>Explosion Sensitivity to Static Discharge:</u> Vapours are not expected to ignite                                                                                                                                                                                                                                                  |             |     |                |     |      |     |              |     |       |     |       |  |
| 5.3         | Special Protective Equipment and Precautions for Fire-Fighters: | Incipient fire responders should wear eye protection. Structural firefighters must wear Self-Contained Breathing Apparatus and full protective equipment. Move containers from fire area if it can be done without risk to personnel. If possible, prevent runoff water from entering storm drains, bodies of water, or other environmentally sensitive areas.                                                                                                                                              |             |     |                |     |      |     |              |     |       |     |       |  |
| 5.4         | HAZCHEM Code                                                    | Not applicable.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |             |     |                |     |      |     |              |     |       |     |       |  |

## 6. ACCIDENTAL RELEASE MEASURES

|     |                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|-----|----------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 6.1 | Personal Precautions | Uncontrolled releases should be responded to only by trained personnel using pre-planned procedures. Proper protective equipment should be used. In case of a spill, clear the affected area and protect people.                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|     | Protective equipment | For small releases (< 20 litres), clean up spilled liquid wearing gloves, goggles, face shield, and suitable body protection. Absorb with earth, sand or other non-combustible material and transfer to containers for proper disposal. The minimum Personal Protective Equipment recommended for response to non-incident releases (more than 20 litres) should be gloves (neoprene gloves or nitrile gloves), chemical resistant boots and full-face respirator with Organic Vapour cartridge. Monitoring must indicate oxygen levels above 19.5% in order to use air purifying respirators. Prevent further leak/release if it is safe to do so. Do not let the product enter drains. |

|     |                                                       |                                                                                                                                                                                                                                                                                                                                |
|-----|-------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|     | Emergency procedures                                  | Eliminate all ignition sources. Stop leak if you can do so without risk. Monitoring must indicate that exposure levels are below those provided in Section 8 (Exposure Controls-Personal Protection) and that oxygen levels are above 19.5% before anyone is permitted in the area without Self-Contained Breathing Apparatus. |
| 6.2 | Environmental Precautions                             | Prevent release into the environment. Do not discharge into sewers or waterways. May produce adverse effects to marine organisms and their environment. If the product enters soil it will be highly mobile and may contaminate groundwater.                                                                                   |
| 6.3 | Methods and Materials for Containment and Cleaning Up | Use absorbent material for cleaning up spills. Collect spilled material for proper disposal. Decontaminate the area thoroughly. Place all spill residues in a suitable container. Dispose of in accordance with applicable Australian Federal, State, or local procedures, or appropriate local standards.                     |

## 7. HANDLING and STORAGE

|     |                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|-----|-------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 7.1 | Precautions for Safe Handling | All employees who handle this material should be trained to handle it safely. Open containers carefully on a stable surface. Ensure all connections are tight before transfer. Empty containers may contain residual liquid; therefore, empty containers should be handled with care. Keep away from ignition sources; no smoking.<br><br>As with all chemicals, avoid getting this product ON YOU or IN YOU. Wash thoroughly after handling this product. Do not eat or drink while handling this material. Remove contaminated clothing promptly. |
| 7.2 | Conditions for Safe Storage   | Keep containers tightly closed. Store individual containers out of direct sunlight. Tanks should be stored away from intense heat or direct sunlight. Avoid freezing. Store away from incompatible materials. Storage and use areas should be covered with impervious materials. Keep container tightly closed when not in use. If appropriate, post warning signs in storage and use areas. Inspect all incoming containers before storage, to ensure containers are properly labelled and not damaged.                                            |
|     | Incompatibilities             | No significant incompatibilities are expected.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

## 8. EXPOSURE CONTROLS - PERSONAL PROTECTION

|       |                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                          |            |                           |
|-------|---------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|------------|---------------------------|
| 8.1   | Appropriate Engineering Controls.     | Ensure ventilation is adequate and that air concentrations of components are controlled below quoted Exposure Standards. Avoid generating and inhaling mists. Use with local exhaust ventilation or while wearing organic vapour respirator or particulate respirator meeting the requirements of AS1715 and AS1716. Keep containers closed when not in use.                                                                                                                                                                                                                                                 |                          |            |                           |
| 8.2   | Personal Protective Equipment         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                          |            |                           |
|       | Respiratory protection:               | None needed under normal conditions of use. Use only approved respirators if ventilation is inadequate to control mists or vapour.                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                          |            |                           |
|       | Eye protection:                       | Use approved safety goggles or safety glasses. Splash goggles with a face shield may be needed if splash hazards exist.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                          |            |                           |
|       | Hand protection:                      | Wear chemical impervious gloves (e.g., Solvex™, Neoprene, Nitrile).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                          |            |                           |
|       | Body protection:                      | None normally needed. If needed, use body protection appropriate for task (e.g., Tyvek suit, rubber apron) to protect from splashes and sprays. Nomex coveralls are recommended for handling bulk product.                                                                                                                                                                                                                                                                                                                                                                                                   |                          |            |                           |
| 8.3   | Biological monitoring                 | Biological monitoring is required if ventilation is inadequate to maintain concentration of airborne hazardous chemicals below the following exposure standards.<br><br>STEL sets the <i>short term exposure limit</i> , which is the maximum concentration of a substance to which a person can be exposed over a 15-minute period. The TWA sets a time-weighted average airborne concentration to which a person may be exposed. This product is a mixture. The following sets exposure standards only for its constituent parts. Exposure standards have not been determined for this product as a whole. |                          |            |                           |
| 8.3.1 | Exposure standards [NOHSC:1003(1995)] | TWA (ppm)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | TWA (mg/m <sup>3</sup> ) | STEL (ppm) | STEL (mg/m <sup>3</sup> ) |

| Vapour Density (air = 1)                           | Not evaluated                               | Vapour Pressure mm Hg @ 20°C:          | Not evaluated  |
| Solubility (in water)                              | Completely soluble                          | Relative density (water = 1)           | 1.15           |
| Viscosity                                          | Water-thin                                  | Oil-Water Partition Coefficient        | Not evaluated  |
| How To Detect This Substance (Warning Properties): | This product will smell distinctively       |                                        |                |

## 10. STABILITY and REACTIVITY

|      |                                    |                                                                                                                                                                                                                         |
|------|------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 10.1 | Reactivity                         | Expected to be stable over a range of operating conditions.                                                                                                                                                             |
| 10.2 | Chemical Stability                 | Stable under normal use and storage.                                                                                                                                                                                    |
| 10.3 | Possibility of hazardous reactions | Hazardous polymerization will not occur.                                                                                                                                                                                |
| 10.4 | Conditions to avoid                | Avoid mixing with incompatible substances.                                                                                                                                                                              |
| 10.5 | Incompatible materials             | This product is not expected to have any significant incompatibilities.                                                                                                                                                 |
| 10.6 | Hazardous decomposition products   | If involved in fire, this product thermally degrades to carbon dioxide, monoxide, and other toxic gasses and vapours. Besides these hazards, this product is not expected to have any hazardous decomposition products. |

## 11. TOXICOLOGICAL INFORMATION

### 11.1 Toxicology Information

Note: This product has not been evaluated for its toxicity as a whole.

| Component                                     | Oral LD <sub>50</sub> (mg/kg) | Dermal LD <sub>50</sub> (mg/kg) | Inhalation LC <sub>50</sub> (mg/m <sup>3</sup> ) | Skin Irritation | Serious eye damage |
|-----------------------------------------------|-------------------------------|---------------------------------|--------------------------------------------------|-----------------|--------------------|
| Sodium Metasilicate (CAS # 6834-92-0)         | 1152 – 1349 mg/kg (Rat)       | No data available               | No data available                                | YES             | YES                |
| Potassium Hydroxide (CAS # 1310-58-3)         | 333 mg/kg (Rat)               | No data available               | No data available                                | YES             | YES                |
| Ethyl Glycol Monobutyl Ether (CAS # 111-76-2) | 1746 mg/kg (Rat)              | >2000 mg/kg (Rat)               | No data available                                | YES             | Irritation         |
| Proprietary Surfactant Blend (CAS # secret)   | No data available             | No data available               | No data available                                | YES             | Serious irritation |

## 12. ECOLOGICAL INFORMATION

ALL WORK PRACTICES MUST BE AIMED AT ELIMINATING ENVIRONMENTAL CONTAMINATION.

### 12.1 Ecological Information

Note: This product has not been evaluated for its ecologic impact as a whole.

| Component                             | Toxicity to fish                     | Toxicity to daphnia | Bioaccumulation   | Solubility        | Biodegradability  |
|---------------------------------------|--------------------------------------|---------------------|-------------------|-------------------|-------------------|
| Sodium Metasilicate (CAS # 6834-92-0) | 210 mg/L (LC50, 96 hr, zebra fish)   | No data available   | Not expected      | Soluble           | No data available |
| Potassium Hydroxide (CAS # 1310-58-3) | 80 mg/L (LC50, 96 hr, mosquito fish) | No data available   | No data available | No data available | No data available |

|                                                  |                                                 |                                                      |                                                                             |         |                                                          |
|--------------------------------------------------|-------------------------------------------------|------------------------------------------------------|-----------------------------------------------------------------------------|---------|----------------------------------------------------------|
| Ethyl Glycol Monobutyl Ether<br>(CAS # 111-76-2) | 1490 mg/L<br>(LC50, 96 hr,<br>bluegill sunfish) | 835 mg/L (EC50,<br>48 hr, <i>Daphnia<br/>magna</i> ) | Low                                                                         | Soluble | Biodegradable                                            |
| Proprietary Surfactant Blend<br>(CAS # secret)   | 6 mg/L (LC50,<br>96 hr, fish)                   | No data available                                    | Moderate, may<br>accumulate in water,<br>soil and impact fauna<br>and flora | Soluble | Complete<br>biological<br>degradability less<br>than 60% |

|      |                                  |                                                                                                              |
|------|----------------------------------|--------------------------------------------------------------------------------------------------------------|
| 12.2 | Persistence and Degradability    | This product is expected to be readily biodegradable.                                                        |
| 12.3 | Bio-accumulative Potential       | This product is not expected to bio-accumulate.                                                              |
| 12.4 | Mobility in Soil                 | When spilled onto soil, this product is expected to evaporate slowly.                                        |
| 12.5 | Other Adverse Ecological Effects | This product may be harmful to aquatic life if large volumes of it are released into an aquatic environment. |

### 13. DISPOSAL CONSIDERATIONS

|                                               |                                                                                                                                                                               |
|-----------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Preparing Wastes of this Product for Disposal | Waste disposal must be in accordance with appropriate Australian Federal, State, and local regulations or with local regulations.                                             |
| Disposal of Contaminated Packaging            | Cleaned containers can be recycled or disposed of as non-contaminated waste, if authorized by your local authorities. Dispose of containers as required by local regulations. |

| 16.5 | A large number of abbreviations and acronyms appear on this SDS. The following constitutes definitions of those commonly used terms. |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|      | Section 2                                                                                                                            | <b>GHS:</b> Global Harmonization System<br><b>Model WHS:</b> Australia's model Workplace Health and Safety Guidelines<br><b>CLP:</b> Classification and Packaging<br><b>STOT:</b> Specific Target Organ Toxicity                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|      | Section 3                                                                                                                            | <b>CAS #:</b> Chemical Abstract Service index number                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|      | Section 5                                                                                                                            | <b>Health Hazard: 0</b> (material that on exposure under fire conditions would offer no hazard beyond that of ordinary combustible materials); <b>1</b> (materials that on exposure under fire conditions could cause irritation or minor residual injury); <b>2</b> (materials that on intense or continued exposure under fire conditions could cause temporary incapacitation or possible residual injury); <b>3</b> (materials that can on short exposure could cause serious temporary or residual injury); <b>4</b> (materials that under very short exposure could cause death or major residual injury). <b>Flammability Hazard</b><br><b>Reactivity Hazard:</b> Refer to definitions for "Hazardous Materials Identification System".<br><b>Flash Point:</b> Minimum temperature at which a liquid gives off sufficient vapours to form an ignitable mixture with air. <b>Auto-ignition Temperature:</b> The minimum temperature required to initiate combustion in air with no other source of ignition.<br><b>LEL:</b> The lowest percent of vapour in air, by volume, that will explode or ignite in the presence of an ignition source. <b>UEL:</b> The highest percent of vapour in air, by volume, that will explode or ignite in the presence of an ignition source. |
|      | Section 8                                                                                                                            | <b>TLV - Threshold Limit Value</b> - an airborne concentration of a substance which represents conditions under which it is generally believed that nearly all workers may be repeatedly exposed without adverse effect. The duration must be considered, including the 8-hour Time Weighted Average ( <b>TWA</b> ), the 15-minute Short Term Exposure Limit, and the instantaneous Ceiling Level ( <b>C</b> ). Skin absorption effects must also be considered<br><b>IDLH - Immediately Dangerous to Life and Health</b> - This level represents a concentration from which one can escape within 30-minutes without suffering escape-preventing or permanent injury. <b>The DFG - MAK</b> is the Republic of Germany's Maximum Exposure Level, similar to the U.S. PEL. <b>NIOSH</b> is the National Institute of Occupational Safety and Health, which is the research arm of the U.S. Occupational Safety and Health Administration ( <b>OSHA</b> ). NIOSH issues exposure guidelines called <b>Recommended Exposure Levels (RELs)</b> . When no exposure guidelines are established, an entry of <b>NE (Not Established)</b> is made for reference.                                                                                                                             |
|      | Section 11                                                                                                                           | <b>LD<sub>50</sub></b> : Lethal Dose (solids & liquids) which kills 50% of the exposed animals;<br><b>LC<sub>50</sub></b> : Lethal Concentration (gases) which kills 50% of the exposed animals;<br><b>ppm:</b> Concentration expressed in parts of material per million parts of air or water;<br><b>mg/m<sup>3</sup></b> : Concentration expressed in weight of substance per volume of air;<br><b>mg/kg:</b> Quantity of material, by weight, administered to a test subject, based on their body weight in kg<br><b>IARC</b> - the International Agency for Research on Cancer;<br><b>NTP</b> - the National Toxicology Program,<br><b>RTECS</b> - the Registry of Toxic Effects of Chemical Substances,<br><b>TDLo</b> , the lowest dose to cause a symptom and<br><b>TCLo</b> the lowest concentration to cause a symptom;<br><b>TDo, LDLo, and LDo, or TC, TCo, LCLo, and LCo</b> , the lowest dose (or concentration) to cause lethal or toxic effects.<br><b>BEI</b> - Biological Exposure Indices, represent the levels of determinants which are most likely to be observed in specimens collected from a healthy worker who has been exposed to chemicals to the same extent as a worker with inhalation exposure to the TLV.                                            |

|  |            |                                                                                                                                                                                                              |
|--|------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | Section 12 | <b>LC<sub>50</sub></b> : The lowest concentration in water which kills 50% of the test subjects.<br><b>EC<sub>50</sub></b> : The Effect Concentration in water at which 50% of the test species is affected. |
